New children's book about agronomy

It has nothing to do with oats, but it does have to do with crop science, and Shawn did come and speak at AOWC 2014, so we're going to plug his book. Shawn Conley (U. Wisconsin, @BadgerBean) has published a children's book called ["Coolbean the Soybean"](#). It's aimed at kids in grades 3-5, and talks about the life cycle of the soybean as well as crop management practices. I know what my niece is getting for her birthday!
